

C.D. NAKYINKI

[illegible]

C.D. NA RYS NR 3

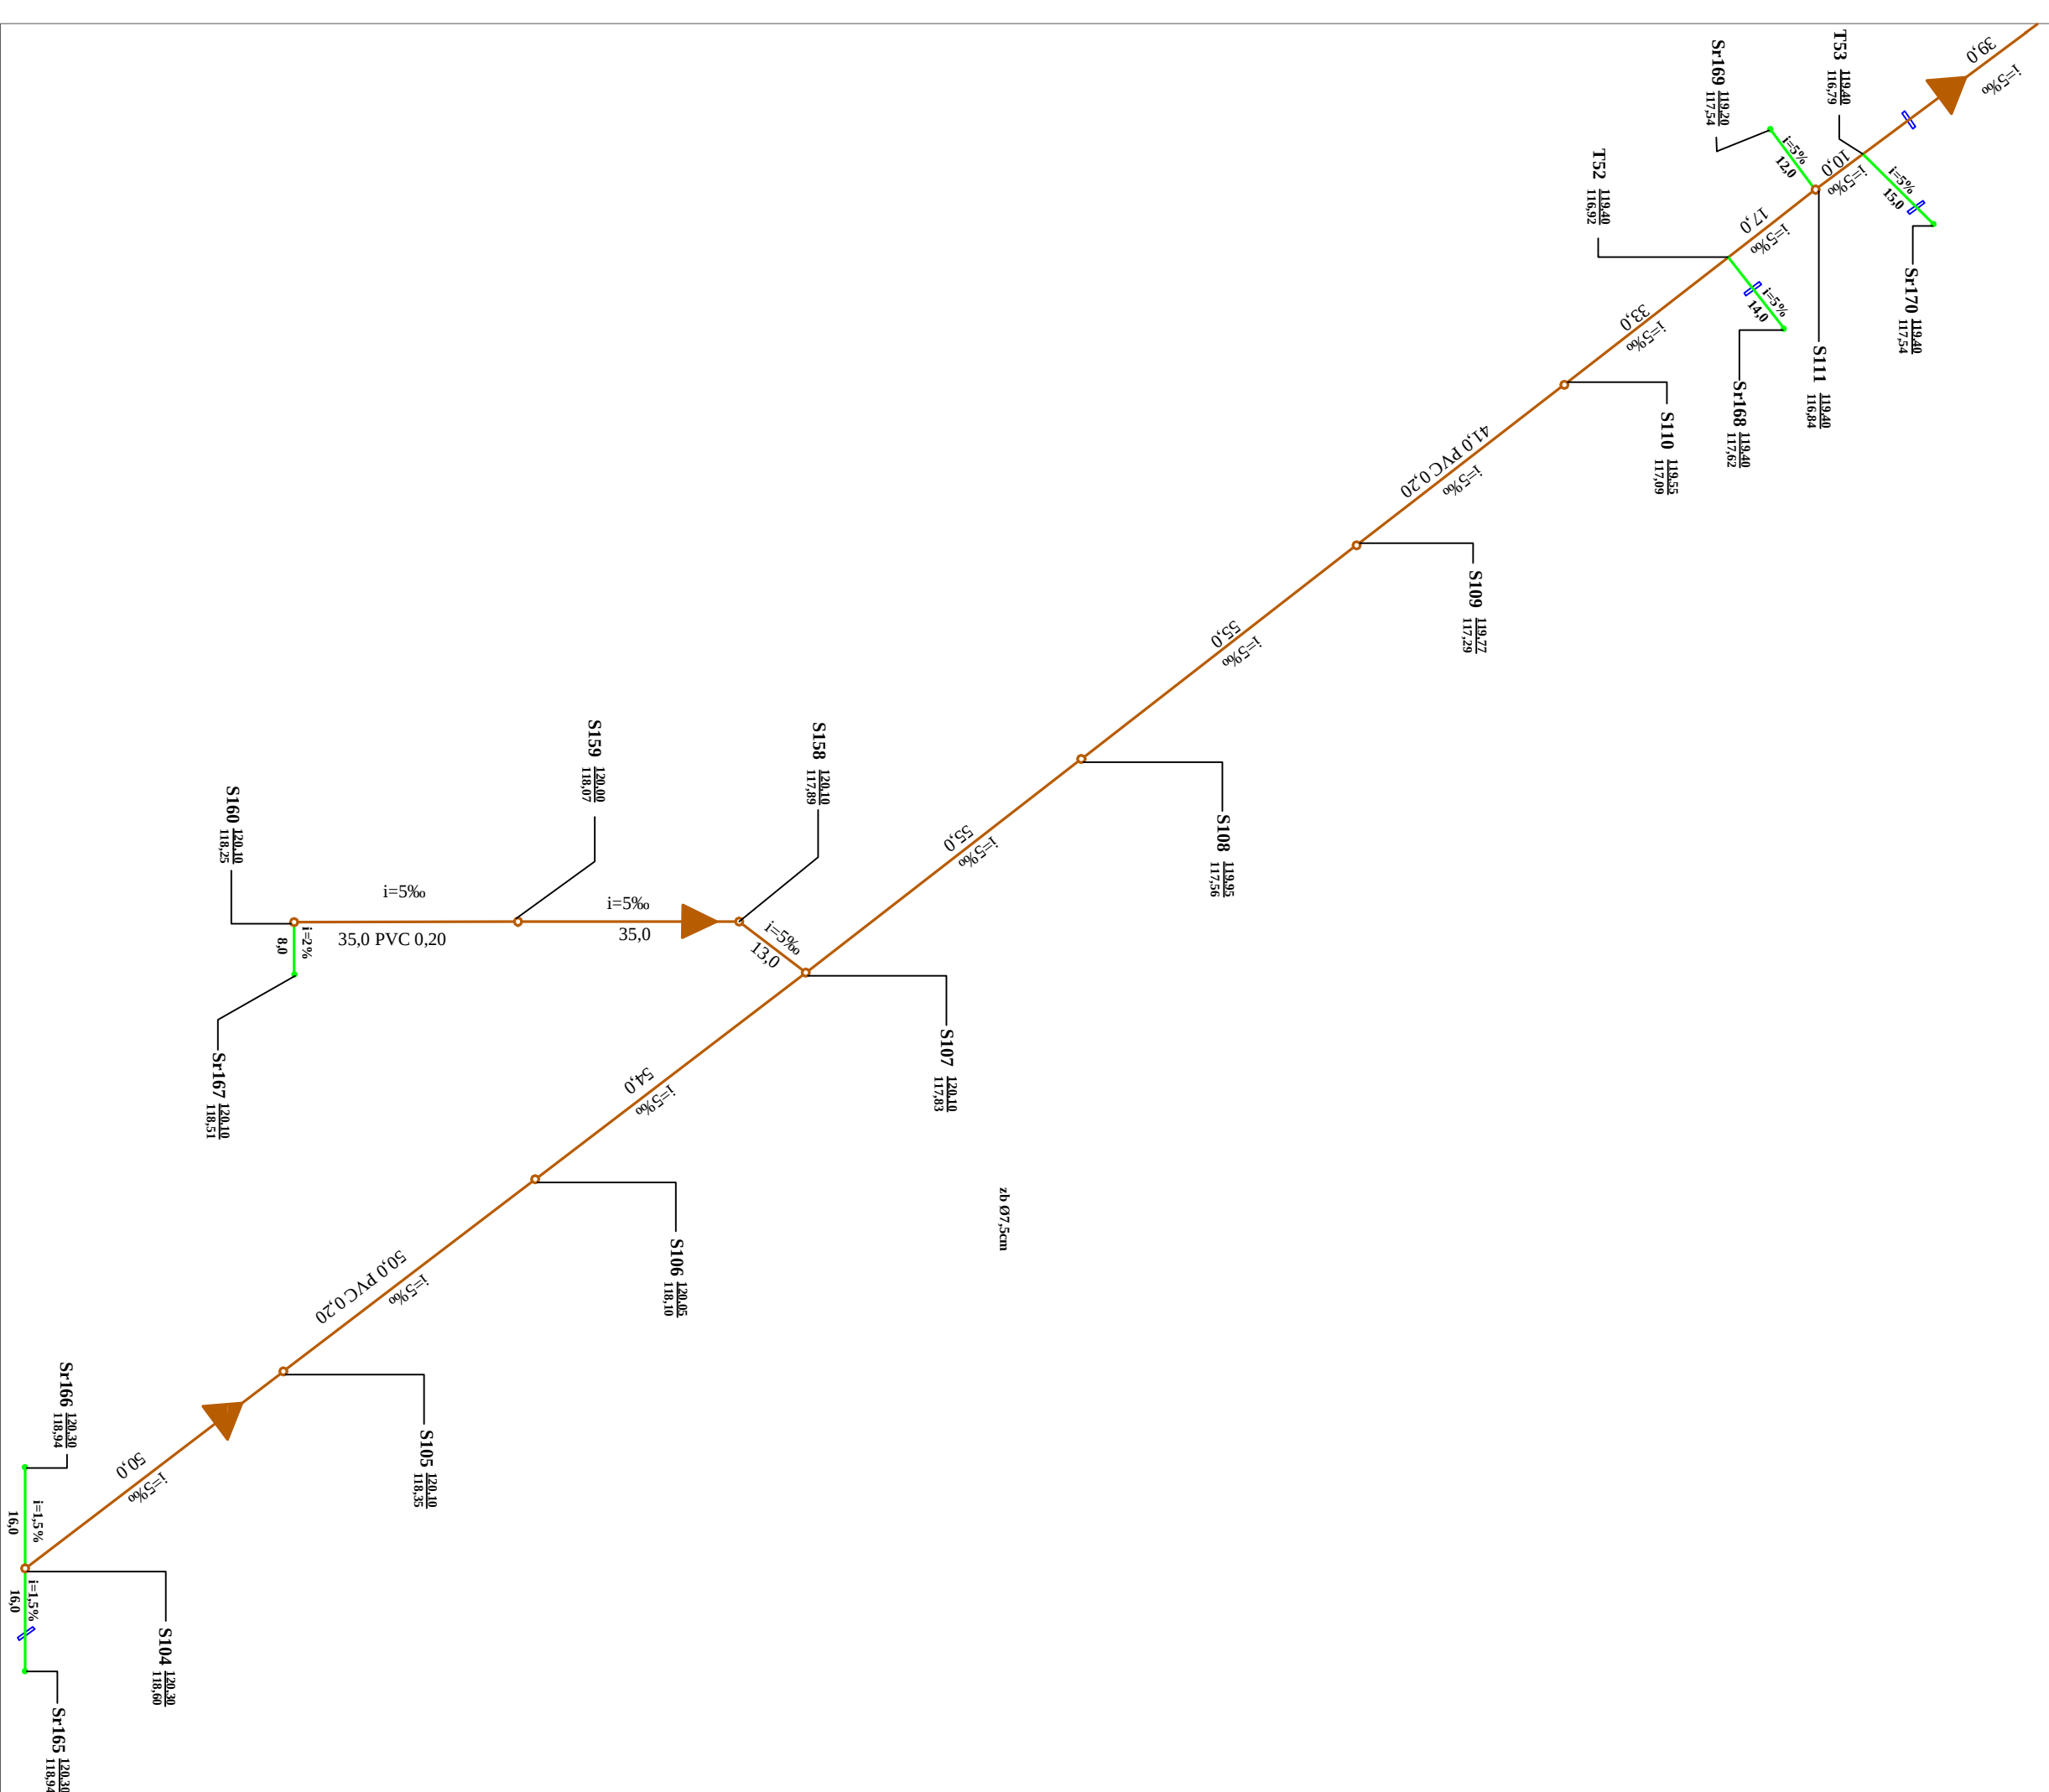

Diagram illustrating the structure of the 18S rRNA gene and its primary structure. The top part shows the gene with exons (orange, green, blue, red) and introns (yellow, pink, purple, light blue). The bottom part shows the primary structure of the 18S rRNA molecule, with the same color coding for exons and introns. The 5' end is labeled '5' A' and the 3' end is labeled '3' A'.
